

# Unique Food Concepts

Unique Food Concepts is an IPAP supplier that has spent several years researching, developing and experimenting to produce the **unmatched** line of authentic Hispanic cheese the company is known for.

From Queso Blanco, Queso Quesadilla, Oaxaca and Cotija to shredded specialty blends like Spinach and Artichoke or Mediterranean, Unique Food Concepts brings new and exciting flavors to the kitchen. This resourceful supplier sets itself apart by listening to your consumers and turning their foodservice ideas into reality. Its goal is to generate an added efficiency for the end user by creating a product from scratch that is **unique** so every dish can stand out from its competitors.

Apart from its **exclusive** blends and concepts, Unique Food Concepts founded its success by creating Hispanic cheeses so accurate to the traditional flavor profiles that a Mexican gentleman told them, through an interpreter, that "the cheeses taste just like those in my home province in Mexico". Some of the primary items in its **authentic** Hispanic cheeses line are:

- Queso Blanco
- Queso Quesadilla
- Queso Fresco
- Cotija
- Manchego
- Enchilado
- Asadero
- Queso Panela
